Head of Research and Analytics

As Head of Research and Analytics, I led the scaling of the global analytics function. I acted as a strategic partner to the CMO and C-level stakeholders, bridging the gap between raw data and business growth. My focus was on building a high-performing team, optimizing marketing ROI, and maturing the company’s data infrastructure.

Key Achievements:
1. Strategic Leadership: Spearheaded annual KPI planning and quarterly alignment across marketing and analytics. Developed frameworks that translated business goals into actionable metrics for senior leadership.
2. Full-Funnel Marketing Analytics: Managed end-to-end reporting for the entire marketing split (awareness, consideration, lead gen). Delivered deep-dive insights to optimize global budgets and channel efficiency.
3. Infrastructure & Governance: Scaled the analytics platform using BigQuery, dbt, and Airflow. Established data quality policies and QA processes to ensure 100% integrity across the data pipeline.
4. Operational Excellence: Implemented SCRUM methodology from scratch, significantly improving team transparency, delivery speed, and operational efficiency.
5. Executive Management: Primary analytical contact for the CMO and board. Developed strategic presentations and analytical inputs for high-stakes decision-making forums.
6. Data Culture & Mentorship: Mentored a cross-functional team and drove a culture of analytical rigor. Led data literacy initiatives to empower departments with self-service insights.

Tech Stack & Keywords:

- Infrastructure: BigQuery (SQL), GCS, dbt, Apache Airflow, ETL Pipelines.
Analytics & BI: GA4, GTM (Server-side), Looker, Tableau, Power BI, Looker Studio.
- Strategic: Analytics Roadmap, Data Governance, Stakeholder Management, KPI Frameworks, SCRUM/Agile.
- Marketing Focus: ROMI/ROAS, Lead Gen Optimization, Brand & Performance Analytics, Multi-touch Attribution.

Skills: Analytics Management · Stakeholder Management · Team Leadership · Brand & Performance Analytics · Data Strategy · Data Governance · Multi-touch Attribution. · Conversion Rate Optimization (CRO)

Head of Marketing Analytics

As Head of Analytics, I built the data function from scratch, scaling the infrastructure from fragmented Excel tracking to a robust DWH ecosystem. I served as the technical and strategic lead, bridging the gap between Engineering, Marketing, and C-level stakeholders to drive ROI and data-informed decision-making.

Key Achievements:
1. Data Strategy & Leadership: Recruited and managed the analytics team; established data governance standards and a centralized internal Analytics Wiki for documentation.
2. Infrastructure Architecture: Architected a scalable Data Warehouse (DWH) using GCS and BigQuery, centralizing product, marketing, and financial data for a single source of truth.
3. Financial & Growth Modeling: Developed the company's first P&L model and forecasting framework, which were instrumental in securing investor funding.
4. Marketing & LTV Analytics: Built automated Predictive LTV and Unit Economics models; optimized marketing spend by implementing automated pipelines for cost allocation and retention.
5. Mobile Tracking & Privacy (iOS): Designed event taxonomies and tracking plans for app releases. Implemented SKAdNetwork (SKAN) Conversion Value mapping for accurate ROAS measurement.
6. BI & Actionable Reporting: Deployed a Looker Studio ecosystem with anomaly alerting; delivered strategic insights directly to the CEO and Co-founders.
7. Data Integrity: Established end-to-end QA processes and ETL pipelines, ensuring 100% data transparency and accuracy across the analytics funnel.

Tech Stack & Keywords:
- Infrastructure: BigQuery (SQL), Google Cloud (GCS), dbt, ETL Pipelines, API Integrations.
- Mobile & Web: Adjust, AppsFlyer (MMP), SKAdNetwork (SKAN), Firebase, Amplitude, GA4, GTM.
- Modeling: Python (Pandas, NumPy, Scikit-learn), Predictive LTV, Forecasting, Statistics.
- BI & Metrics: Looker Studio, Tableau, Power BI, ROI/ROAS, CAC, Unit Economics, Retention, ARPU, Multi-touch Attribution.

Skills: Analytics Strategy · Stakeholder Management · Marketing Analytics · Marketing Technology · Mobile Analytics · Mobile Attribution · MMP · Data Quality · Team Leadership · Data Architecture · Analytics Management

Analytics Solution Lead (Google Marketing Platform)

As Analytics Solution Lead, I headed the Data Analytics division, architecting end-to-end measurement ecosystems for enterprise clients across Eastern Europe and Central Asia. I served as a strategic advisor for the Google Marketing Platform (GMP) suite, bridging the gap between premium advertising technology and business intelligence for global brands.

Key Achievements:
1. Team Leadership: Led the agency's analytics department, establishing operational workflows and resource planning, delivering full-stack measurement solutions for Tier-1 clients including BAT Ukraine and Pepsi Uzbekistan.
2. GMP 360 Ecosystem: Spearheaded the implementation of premium products, including GA4 360, GTM 360, DV360, and Ads Data Hub (ADH), ensuring seamless data flow.
3. Solution Architecture: Designed complex tracking frameworks and custom event taxonomies; mapped business requirements to technical specifications for high-fidelity data collection.
4. Pre-sales & Technical Advisory: Acted as a Solution Consultant for high-stakes pre-sales, providing technical scoping, integration planning, and feasibility assessments for premium GMP contracts.
5. Internal Standardization: Developed a proprietary library of delivery assets, including standardized measurement briefs, documentation templates, and QA guidelines to ensure agency-wide quality.
6. Certification & Training: Secured and maintained Google Business Partner status through technical case studies. Conducted expert-level workshops and training for client stakeholders.

Tech Stack & Keywords:
- GMP 360: GA4 360, GTM 360, Display & Video 360 (DV360), Ads Data Hub (ADH), BigQuery.
- Implementation: Event Taxonomy Design, Server-side GTM, Data Layer Architecture, Privacy-First Tracking.
- Consulting & Strategy: Pre-sales Consulting, Solution Design, Technical Audits, Measurement Planning, Marketing Attribution.
- Business Intelligence: Reporting Automation, Data Integrity QA, Stakeholder Training, Knowledge Management.

Skills: Analytics Project Management · Data Analytics Leadership · Google Marketing Platform · Client Relations · Digital Strategy · Pre-Sales Consulting · Data Privacy & Compliance · Stakeholder Management · Data Architecture · Conversion Rate Optimization (CRO)

Team Lead & Product Owner, Front Data Analytics

As both Team Lead and Product Owner, I spearheaded the front-end data analytics direction for a global iGaming leader. I led the strategic shift from third-party vendors to a custom-built internal tracking ecosystem, managing a distributed team of 12+ analysts and aligning technical infrastructure with global business goals.

Key Achievements:
1. Product Ownership (Clickstream): Acted as PO for the internal tracking tool, defining the roadmap and event taxonomy used across global marketing and product teams.
2. Infrastructure Optimization: Managed high-load data streaming pipelines via Centrifugo into ClickHouse, focusing on scaling, performance tuning, and ensuring 24/7 data availability for the global DWH.
3. Strategic Migration: Led the full-scale migration from the Google Marketing Platform (GA360, GTM)

to a proprietary solution, significantly reducing costs and increasing data ownership.
4. Global Team Leadership: Managed and scaled a distributed team of 12+ analysts across Ukraine, India, and Canada; oversaw hiring, mentoring, and performance reviews.
5. Agile & Operational Excellence: Support Scrum routines (sprint planning, backlog grooming), ensuring delivery discipline and transparency for regional stakeholders.
6. Data Literacy & Education: Developed technical training for analysts covering SQL, Jupyter, and event markup, fostering a high-standard technical culture.
7. Quality Governance: Implemented end-to-end QA and incident resolution protocols, maintaining high data integrity across multiple regional platforms.

Tech Stack & Keywords:
- Infrastructure: ClickHouse, Centrifugo, Google Cloud (GCS), Streaming Pipelines, API Integrations.
- Analytics: GA360 (Migration), GTM, Jupyter Notebooks, SQL, Internal Tracking Tools.
- Methodology: Product Ownership, Scrum/Agile, Event Taxonomy, Data Governance, Technical Roadmap.
- Leadership: Global Team Management (12+), Stakeholder Management, Mentoring, Resource Planning.

Skills: Product Ownership · Agile Management · Team Leadership · Product Roadmap · Change Management · Technical Mentoring · Data Governance · Data Architecture

Team Lead Data Analytics

As Team Lead, I built the analytics function from scratch, serving as the de-facto Head of Analytics. I architected the measurement strategy and data infrastructure to enable executive decision-making across product and marketing teams.

Key Achievements:
1. 0-to-1 Analytics Function: Built the data department from the ground up, covering tracking design, data engineering, BI, and experimentation frameworks.
2. Executive Partnership: Partnered with CPO and CMO to translate business goals into data strategies, supporting product growth and marketing ROI.
3. Tracking Architecture: Designed a comprehensive web analytics strategy, including custom event taxonomies, technical specs, and rigorous QA protocols.
4. Data Infrastructure & BI: Directed the integration of data pipelines and developed dashboards for mission-critical metrics and financial performance.
5. Advanced Experimentation: Optimized A/B testing using Bootstrap resampling and non-parametric tests (Mann-Whitney U) to ensure statistical rigor in conversion analysis.
6. FinTech & Anti-Fraud Analytics: Conducted deep-dives into Stripe Radar impact, optimizing risk-score thresholds. Analyzed refund dynamics, dispute rates, and financial losses from "Early Fraud Prevention" to balance security and revenue.
7. Team & Governance: Recruited and managed analysts and a data engineer. Established an internal knowledge base and documentation standards for scalability.

Tech Stack & Keywords:
- Infrastructure: SQL, Data Pipelines, ETL/ELT, DWH Integration, API.
- Modeling: A/B Testing, User Behavior Analysis, Predictive LTV, Statistics.
- Analytics: Web Analytics (GA/GTM), Taxonomy Design, Dashboards, Funnels.
- Leadership: 0-to-1 Building, C-level Stakeholder Management, Mentoring.

Skills: Analytics Operations · Data-Driven Strategy · A/B Testing Frameworks · Predictive Modeling · Product Metrics · Measurement Strategy · Event Taxonomy Design · Business Intelligence Reporting · Analytics Management · Conversion Rate Optimization (CRO)

Senior Data Analyst

As a Senior Data Analyst within the consulting division, I delivered end-to-end analytics expertise for global enterprise clients. Working in cross-functional teams, I bridged the gap between digital product development and business objectives by implementing strategic measurement frameworks for high-profile FMCG and E-commerce brands.

Key Achievements:
1. Enterprise Consulting: Acted as a lead analytics consultant for Johnson & Johnson (US & CIS) and Schneider Electric (EU), aligning data strategies with global market requirements.
2. Measurement Frameworks: Designed comprehensive tracking strategies and event taxonomies based on detailed User Journey mapping and stakeholder goal alignment.
3. Feature Performance Tracking: Developed methodologies to measure the efficiency of new product features (e.g., Assistant, Surveys), identifying bottlenecks and predicting impact on Retention and Conversion rates.
4. Conversion & UX Research: Executed data-driven research projects and delivered tailored dashboards to inform UI/UX optimizations and Conversion Rate Optimization (CRO) initiatives.
5. Global Deployment & QA: Managed complex analytics implementations across diverse platforms and markets, ensuring tracking accuracy and maintaining rigorous technical documentation.
6. Technical Enablement: Facilitated client onboarding and handover processes, ensuring the seamless integration of analytics into long-term business and product operations.

Tech Stack & Keywords:
- Analytics: GA360, GTM, Event Taxonomy, Measurement Planning, Feature Tracking.
- Strategy: User Journey Mapping, KPI Definition, Stakeholder Management, Digital Consulting.
- Optimization: CRO, UX Insights, Funnel Analysis, Performance Reporting.

Skills: Measurement Strategy · Product Analytics · User Journey Mapping · Conversion Rate Optimization (CRO) · Stakeholder Management · Digital Consulting · Data Governance · Requirements Analysis · Technical Documentation · KPI Frameworks

Lead Data Analyst

As Lead Data Analyst, I managed the central web analytics team, overseeing strategy, delivery, and operational support for global digital products. I acted as the primary bridge between technical execution and business requirements, focusing on team scaling and data integrity.

Key Achievements:
1. Team Leadership & Operations: Managed task allocation, capacity planning, and performance tracking for the analytics division, ensuring delivery discipline across multiple product lines.
2. Measurement Strategy: Defined and supervised the global web analytics roadmap, including

standardized tracking implementations and data quality assurance protocols.
3. Strategic Stakeholder Management: Served as the primary point of contact for product and marketing leadership to align analytics priorities with business-critical goals.
4. Data Literacy & Enablement: Authored and conducted "Advanced Web Analytics" workshops for cross-functional teams, covering GA360, GTM, and Data Studio to increase organizational technical autonomy.
5. Platform Governance: Managed relations with Google Marketing Platform (GMP) partners to resolve complex technical issues and optimize enterprise-level GA360 utilization.

Tech Stack & Keywords:
Analytics: GA360, Google Tag Manager, Data Studio, Conversion Optimization.
Leadership: Team Management, Strategy Development, Stakeholder Management, Mentoring.

About me

Head of Analytics | Data Strategy & Operations | Scaling Teams & Systems 0-to-1 | Ex-SoftSwiss, Epam, Wargaming

Strategic Analytics Leader with 10+ years of experience in building high-performing data functions and scalable infrastructures. I specialize in bridging the gap between complex engineering and executive decision-making, with a proven track record of scaling analytics teams from 0 to 12+ members and transforming fragmented data into robust DWH ecosystems.

My expertise lies at the intersection of Technical Architecture and Business Strategy. Whether building internal data departments for iGaming leaders or providing enterprise-level consulting for global brands, I focus on one goal: driving measurable ROI through product and marketing optimization.

Core Areas of Impact:
1. Strategic Leadership: Expert in defining analytics roadmaps, establishing data governance, and managing C-level stakeholders. I excel at translating business questions into technical requirements while eliminating operational friction.
2. Infrastructure & Architecture: Proven ability to architect scalable Data Warehouses (DWH) using Google BigQuery, GCS, and dbt. Specialized in GMP 360 (GA4, GTM, Ads Data Hub) and privacy-first tracking (SKAdNetwork).
3. Financial & Growth Modeling: Developed sophisticated P&L frameworks, Predictive LTV, and Unit Economics models that have directly influenced investor funding and marketing spend optimization.
4. Conversion Rate Optimization (CRO): A data-driven approach to the full funnel, implementing systematic A/B testing and behavioral analysis to maximize player retention and monetization.

I am an advocate for a "Single Source of Truth" culture, ensuring 100% data transparency and accuracy through rigorous QA processes and automated ETL pipelines.

Technical Ecosystem:
- Languages/Tools: SQL (Expert), Python (Pandas, Scikit-learn), dbt, Airflow.
- Cloud & Analytics: Google Cloud Platform, BigQuery, GA4 360, Ads Data Hub, GTM (Server-side).
- BI & Data Viz: Looker, Tableau, Power BI, Looker Studio.
- Mobile: Adjust, AppsFlyer (MMP), Firebase, Amplitude, SKAN.
